I need 3 pages in total to be developed for front-end and back-end. All pages should be mobile-responsive

1- Signup/Login page(s)
2- Dashboard page
3- Campaigns page

1- Signup/Login page. Create User table accordingly

It should have the usual email/pw login/signup along with Google Signup/Login

2- Dashboard

Campaign Score

App name ⌄   ‖ Pause Campaign

Your Report

🗨 1329
Apporater reviews given

☁ 2326
Installs by Apporater users

The "Review Statistics" graph need to animate on load
Note the highlighted area in with "keyword performance" chart
Use Django orm for DB interaction
I'll provide the db access
Need APIs and their integration

3- Campaigns Page is simply a listing page

Just the "Add App" Button should be below the main table in the center
APIs and their integration required
